Obstetrics

Syllabus

Department	Obstetrics, Gynecology and Perinatology
Curriculum	s310501-ЛечДелоИн-25-4plx Speciality: 31.05.01 General Medicine
Qualification	General Practitioner
Form of education	Full-time

Total academic hours	432	Total (in credits):
Including:		Exam 11
Contact	278	Credits 8, 9, 10
Self-study	127	
Control hours	27	

Course outline in terms

The Syllabus is compiled by:

Doctor of medicine, Professor, Belotserkovtseva L.D.; PhD, Associate Professor, Ivannikov S.E., Lecturer Kudrinskikh I.A.; Lecturer., Keldasova M.R.

The Syllabus

Obstetrics

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on 12.08.2020 No. 988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, "11" June 2025, Record №5

The Syllabus was approved by the department

Obstetrics, Gynecology and Perinatology

Head of Department, Doctor of medicine, Professor, Belotserkovtseva L.D.

1. COURSE OBJECTIVES	
1.1	The main goal of mastering the discipline is the student's clinical training: acquiring knowledge of the etiology, pathogenesis, and clinical presentation of obstetric pathologies; developing clinical reasoning for diagnosing obstetric and gynecological disorders based on symptoms, disease syndromes, and nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems (ICD-10); performing differential diagnosis of diseases; determining treatment strategies for managing patients with various nosological conditions; mastering practical skills required for managing normal (physiological) pregnancy and conducting deliveries.

2. COURSE OVERVIEW	
Course code (in curriculum)	B1.O.04
2.1 Assumed background knowledge:	
2.1.1	Chemistry
2.1.2	Latin
2.1.3	Biology
2.1.4	Philosophy
2.1.5	Histology, Embryology, Cytology
2.1.6	Bioethics
2.1.7	Anatomy
2.1.8	Human Physiology
2.1.9	Biochemistry
2.1.10	Microbiology, Virology
2.1.11	Immunology
2.1.12	Pharmacology
2.1.13	Pathologic Anatomy
2.1.14	Clinical Pathologic Anatomy
2.1.15	General Surgery, X-ray Diagnostics
2.1.16	Internal Diseases Propaedeutics, X-Ray Diagnostics
2.1.17	Public health and health care, Economy of Public Health
2.2 Post-requisite courses and practice:	
2.2.1	Pediatric gynecology
2.2.2	Industrial practice of obstetric and gynecological profile
2.2.3	Perinatology

3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)

PC-1.1: Demonstrates knowledge of etiology, pathogenesis, and diagnostic criteria (clinical—subjective, physical, laboratory, instrumental); identifies the patient's primary pathological conditions, symptoms, disease syndromes, and diagnoses nosological forms in accordance with the International Classification of Diseases (ICD-10/11).
PC-1.2: Performs differential diagnosis, assesses disease prognosis (short-, medium-, and long-term), and identifies acute complications and chronic disease exacerbations.
PC-3.1: Conducts patient examinations—collects and analyzes patient history, complaints, and physical examination findings; determines the necessary diagnostic workup; interprets laboratory, instrumental, and pathological-anatomical results; and evaluates disease prognosis (short-, medium-, and long-term) and outcomes.
PC-3.2: Formulates preliminary and clinical diagnoses in accordance with ICD-10/11 and current clinical classifications.
PC-3.4: Implements patient routing and management following established legal frameworks (clinical guidelines, medical care standards, and treatment protocols).
PC-4.1: Manages normal (physiological) pregnancy and delivery.
PC-4.2: Demonstrates the ability to collaborate with an obstetrician-gynecologist in managing high-risk pregnancies and postpartum complications.
PC-5.1: Demonstrates knowledge of pharmacotherapy mechanisms, therapeutic nutrition, medical devices, non-drug treatments, and personalized/palliative care approaches.
PC-5.2: Provides evidence-based treatment to patients in outpatient, inpatient, and high-tech care settings, utilizing pharmacotherapy, medical devices, and nutritional therapy in accordance with clinical guidelines and care standards.
PC-5.4: Understands drug side effects, administration methods, duration of use, and evaluates the safety and efficacy of pharmacotherapy, nutritional therapy, and non-drug treatments (including palliative care).

By the end of the course students must:

3.1	Know
3.1.1	- interrelation of the body's functional systems and their regulatory mechanisms.
3.1.2	- organization and implementation of medical examinations for women, including analysis of their effectiveness.
3.1.3	- fundamental principles of statistical methods for processing medical data.
3.1.4	- standard healthcare documentation in the Russian federation (laws, technical regulations, international/national standards, orders, guidelines, terminology, current international classifications) and documentation for assessing healthcare quality and institutional performance.
3.1.5	- clinical presentation and pathogenesis of major complications during pregnancy, delivery, and the postpartum period; their prevention, diagnosis, and treatment; clinical presentation of borderline conditions in pregnant women, laboring women, and postpartum patients.
3.1.6	- fundamentals of managing pregnancy, childbirth, and the postpartum period; principles of pharmacological and non-pharmacological therapy, physiotherapy, therapeutic exercise, and medical supervision; indications for operative delivery.
3.1.7	- principles of rational nutrition and dietary therapy during pregnancy, postpartum, and lactation.
3.1.8	- modern methods of clinical and laboratory diagnostics and treatment in obstetrics, aligned with standards and clinical protocols.
3.1.9	- principles of pharmacological and non-pharmacological therapy, physiotherapy, therapeutic exercise, and medical supervision; indications for surgical intervention.
3.1.10	- principles of postoperative patient management, prevention of postoperative complications, rehabilitation (including physiotherapy, therapeutic exercise, and medical supervision), and rational dietary therapy post-surgery.
3.1.11	- clinical presentation and pathogenesis of major gynecological pathologies across age groups; their prevention, diagnosis, and treatment.
3.1.12	- principles of pharmacological and non-pharmacological therapy, physiotherapy, therapeutic exercise, and medical supervision; indications for surgical treatment.
3.1.13	- modern methods of clinical and laboratory diagnostics and treatment in gynecology for non-surgical cases, following standards and clinical protocols.
3.1.14	- criteria for selecting the type and extent of surgical intervention.
3.1.15	- principles of postoperative patient management, prevention of complications, rehabilitation (physiotherapy, therapeutic exercise, medical supervision), and postoperative dietary guidelines.
3.1.16	- principles of medical and surgical management of pathological pregnancies, deliveries, and postpartum conditions.
3.1.17	- principles of emergency care (e.g., obstetric hemorrhage, eclampsia).
3.1.18	- indications for episiotomy.
3.1.19	- indications for planned and emergency cesarean section.
3.1.20	- postoperative management of patients after cesarean section.
3.2	Be able to:
3.2.1	- assess the effectiveness of medical examinations.
3.2.2	- analyze key performance indicators of healthcare institutions.
3.2.3	- conduct professional research in the field.
3.2.4	- maintain various types of medical records in healthcare settings.
3.2.5	- prescribe medications for pregnant and gynecological patients based on disease-specific pharmacodynamics and pharmacokinetics.
3.2.6	- interpret laboratory and instrumental test results.
3.2.7	- to make diagnoses according to the international classification of diseases (ICD) using primary and supplementary diagnostic methods. The diagnosis according to the international classification of diseases on the basis of main and additional methods of a research;
3.2.8	- perform primary and supplementary diagnostic procedures to refine diagnoses.
3.2.9	- perform episiotomy.
3.2.10	- manage perineal and abdominal wall sutures (placement and removal).
3.2.11	- prevent milk stasis (engorgement) and treat nipple fissures.
3.2.12	- prepare instrument sets for diagnostic curettage and medical abortion.
3.2.13	- identify common complications of pregnancy, delivery, and the postpartum period.
3.2.14	- perform essential diagnostic and therapeutic procedures for pregnant women, laboring women, and postpartum patients.
