The Syllabus is compiled by:

*PhD in Medical Sciences (Surgery), Associate Professor, Zorkin A. A.*

The Syllabus

**Faculty Surgery**

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on August 12, 2020 No. 988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University 11 June 2026, protocol No. 5

The Syllabus was approved by the department

**Surgical diseases**

Head of Department, Doctor of Medicine, Professor Darwin V.V.

## 1. COURSE OBJECTIVES

1.3	The <b>aim</b> of mastering the discipline "Faculty Surgery" is to develop the ability to make a diagnosis, conduct differential diagnostics and solve tactical issues in the main nosological forms of surgical pathology, including urgent, in their typical and complicated course with substantiation of personalized diagnostic, therapeutic and preventive measures from the standpoint of evidence-based medicine, as well as knowledge of modern principles of providing emergency medical care for urgent surgical diseases and conditions and their complications, including in pregnant women and elderly and
1.4	The <b>objective</b> of the course is the development of students' personal qualities and the formation of general cultural (general scientific, social and personal, instrumental), general professional and professional competencies in accordance with the Federal Educational Standards of Higher Education.

## 2. COURSE OVERVIEW

Course code (in curriculum)	Б1.О.04
<b>2.1 Assumed background knowledge:</b>	
	X-Ray diagnostics
	Pathological physiology
	Pharmacology
	Human anatomy
	Topographic anatomy, operative surgery
	General surgery
	Introductory practice in patient care of therapeutic and surgical profile
<b>2.2 Post requisites:</b>	
	Oncology, radiation therapy
	Industrial practice of surgical profile
	Anesthesiology, intensive care
	Disaster Medicine
	Hospital surgery. Pediatric surgery

## 3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)

<b>PC-8.2: Maintains medical records, including in electronic form</b>
<b>PC-5.1: Demonstrates knowledge of the mechanisms of action, methods of application of pharmacotherapy, therapeutic nutrition, medical devices and methods of non-drug treatment, palliative and personalized medical care</b>
<b>PC-5.2: He will treat various categories of patients with diseases on an outpatient basis, in hospitals and centers of high-tech medical care (HMP) with the use of drugs, medical devices and medical nutrition, taking into account the clinical picture, in accordance with current procedures, standards of medical care( clinical guidelines &amp; treatment protocols)</b>
<b>PC-5.4: Demonstrates knowledge of side effects of drugs, methods of their administration, knowledge of the duration of their use and assesses the effectiveness and safety of pharmacotherapy, medical nutrition and the use of non-drug treatment, medical nutrition in palliative care</b>
<b>PC-3.3: Conducts early and differential diagnosis of diseases</b>
<b>PC-3.4: Carries out routing and management of patients on the basis of current legislation (standards, procedures for the provision of medical care, clinical guidelines)</b>
<b>PC-1.1: Demonstrates knowledge about the etiology, pathogenesis, diagnostic criteria (clinical – subjective, physical, laboratory, instrumental) determines the patient's main pathological conditions, symptoms, disease syndromes and diagnoses nosological forms in accordance with the International Statistical Classification of Diseases and Health-related Problems, X – XI</b>
<b>PC-1.2: Conducts differential diagnosis, evaluates the prognosis (short-, medium- and long-term) of the course of the disease, identifies acute complications and complications of chronic diseases</b>

### By mastering of the course students must:

<b>3.1</b>	<b>Know:</b>
	1. Etiology, pathogenesis, diagnostic criteria (clinical - subjective, physical. laboratory, instrumental, the main pathological conditions, symptoms, syndromes of surgical diseases, classification of nosological forms in accordance with the International Statistical Classification of Diseases and Health Problems, X - XI revisions
	2. Principles of differential diagnosis and prognosis of the course of surgical diseases, diagnosis of acute forms and complications of chronic diseases.
	3. Clinical manifestations of surgical diseases, methods of examination and clarifying diagnostics, as well as their peculiarities in pregnant women and elderly and senile persons.

	4. The principles of routing and management of surgical patients on the basis of current legislation (standards, procedures for the provision of medical care, Clinical guidelines), treatment on an outpatient basis, in hospitals and high-tech medical care (HMP) centers with the use of drugs, medical devices and medical nutrition taking into account the clinical picture, in accordance with current procedures, standards of medical care, clinical guidelines (treatment protocols).						
	5. Mechanisms of action, methods of application of pharmacotherapy, medical nutrition, medical devices and methods of non-drug treatment, palliative and personalized medical care in surgical patients.						
	6. Side effects of drugs, methods of their administration, knowledge of the duration of their use, criteria for the effectiveness and safety of pharmacotherapy, medical nutrition and the use of non-drug treatment, medical nutrition, palliative care in surgical patients.						
	7. Principles of maintaining medical records, including in electronic form						
<b>3.2</b>	<b>be able to:</b>						
	1.To identify typical symptoms and syndromes of surgical diseases in patients in accordance with the list of conditions and diseases included in the program, including emergency conditions.						
	2.To determine the patient's status: to collect an anamnesis, to conduct a survey of the patient and/or his relatives, to conduct a physical examination of the patient (examination, palpation, auscultation, measurement of blood pressure, determination of the properties of arterial pulse, etc.), including in emergency conditions.						
	3.To make a plan for laboratory and instrumental studies of the patient, to interpret their results						
	4.To make a preliminary diagnosis is to synthesize information about the patient in order to determine the pathology and the causes of it						
	5.To develop a plan of therapeutic (surgical) actions, taking into account the course of the disease and its treatment						
	6.To formulate indications for the chosen method of treatment, taking into account etiologic and pathogenetic agents, to justify pharmacotherapy in a particular patient with major pathological syndromes and urgent conditions, to determine the route of administration, regimen and dose of drugs, to evaluate the effectiveness and safety of the treatment						
	7.Before surgery and surgical manipulations, treat hands, the operating field, put on a sterile surgical mask, put on or change sterile gloves, a sterile robe independently and with the help of an operating nurse						
	8. Maintain medical records, including in electronic form						
<b>4. STRUCTURE AND CONTENTS OF THE COURSE (MODULE)</b>							
<b>Class Code</b>	<b>Topic /class type/</b>	<b>Term/Ac. year</b>	<b>Academic hours</b>	<b>Competences</b>	<b>Literature</b>	<b>Interactiv</b>	<b>Notes</b>
	<b>1. Faculty surgery</b>	<b>7</b>					
1.1	History of surgery. The principles of organizing surgical care in the Russian Federation. /Lecture/	7	2	PC-3.4 PC- 8.2	L1.1, L1.2, L2.1, L2.2, E1, E2, E3, E4, E5		
1.2	Acquaintance with the organization and principles of operation of the surgical hospital. Examination of a surgical patient. Registration of medical documentation in a surgical hospital. The program of examination and treatment of a patient with a surgical profile. /Practical classes /	7	4	PC-1.1 PC - 1.2 PC-3.3 PC - 3.4 PC - 5.1 PC -5.2 PC -5.4 PC - 8.2	L1.1, L1.2, L2.1, L2.2, E1, E2, E3, E4, E5
