The Syllabus is compiled by:

PhD in Medical Sciences, Associate Professor, Ivannikov S.E.

Doctor of Medicine, Professor Belotserkovtseva L.D.

The Syllabus

Gynecology

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on August, 12, 2020 №988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, “ 11 ” June 2025, Record No. 5

The Syllabus was approved by the department

Obstetrics, Gynecology and Perinatology

Head of Department, Doctor of Medicine, Professor Belotserkovtseva L.D.

1. COURSE OBJECTIVES	
1.1	The aim of the course is the clinical preparation of the student: the skills of maintaining medical records, clinical thinking in the diagnosis of gynecological pathology based on symptoms, syndromes of diseases, nosological forms in accordance with the International Statistical Classification of Diseases and Related Health Problems, X revision, differential diagnosis of diseases, determination of the therapeutic tactics of managing patients with various nosological forms, mastering the practical skills necessary for the management of gynecological patients.

2. COURSE OVERVIEW	
Course code (in curriculum)	Б1.О.04.44
2.1 Assumed background:	
	Chemistry
	Latin Language
	Biology
	Philosophy
	Histology, Embryology, Cytology
	Bioethics
	Human Anatomy
	Hominal Physiology
	Biochemistry
	Microbiology, Virology
	Immunology
	Pharmacology
	Pathologic Anatomy
	Clinical Pathologic Anatomy
	General Surgery
	Internal Diseases Propaedeutics
	Public Health and Healthcare, Economy of Public Health
2.2 Post requisite courses and practice:	
	Paediatric Gynecology
	Perinatology
	Professional Practice, Obstetrician and Gynecologist assistant
	Obstetrics

3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)
PC-1.1 : Demonstrates knowledge about the etiology, pathogenesis, diagnostic criteria (clinical – subjective, physical, laboratory, instrumental) determines the patient's main pathological conditions, symptoms, disease syndromes and diagnoses nosological forms according to the International Statistical Classification of Diseases and Health-related Problems, X – XI revisions
PC-1.2 : Carries out diagnostics, evaluates the prognosis (short-, medium- and long-term course) of the disease, identifies acute complications and complications of chronic diseases
PC-3.1: Examines the patient (handle the patient's complaints, anamnesis, physical data based on the examination results, determines the necessary examination plan, evaluates the parameters of laboratory, instrumental, pathological, anatomical and other methods in order to diagnose of diseases, assesses the prognosis (short, medium, long-term) of its course and outcomes
PC-3.2: Makes an initial and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Health-Related Problems X - XI revisions and current clinical classifications
PC-3.3: Performs early and differential diagnosis

PC-3.4: Performs patient triage and coordinates care in accordance with current legislation, standards, medical procedures, and clinical recommendations
PC-5.1: Demonstrates knowledge of the methods applied in pharmacotherapy, nutritional therapy, and non-drug treatments (including medical devices), as well as approaches to palliative and personalized medical care.
PC-5.2: Provides patient care across settings – outpatient, inpatient, and high-tech medical centers – administering medications, medical devices, and therapeutic nutrition according to clinical presentation, current standards of care, and clinical guidelines.
PC-5.4: Demonstrates knowledge of side effects of drugs, methods and duration of drug use; assesses the effectiveness and safety of pharmacotherapy, nutritional therapy, and non-drug treatment.
PC-8.2: Maintains medical records in both paper and electronic formats.

By the end of the course students must:

3.1	know:
	<ul style="list-style-type: none"> - interrelation of functional systems of an organism and levels of their regulation. - organization and performance of medical examination of women, analysis of its efficiency. - general principles of statistical methods of processing medical documentation. - standard documentation accepted in health care of the Russian Federation (laws of the Russian Federation, technical regulations, international and national standards, orders, recommendations, terminology, operating international classifications) and also documentation for assessment of quality and overall performance of the medical organizations; - clinical symptomatology and pathogenesis of the main processes of the complications of pregnancy, delivery and the postnatal period, their prevention, diagnostics and treatment, clinical symptomatology of borderline case-studies of pregnant women, women in labor and women in childbirth. - basis of supervising pregnancy, childbirth and the postnatal period, the principles of medication and non- drug therapy, physical therapy, physiotherapy measures and medical control, the indications to an operational childbirth; - basis of rational nutrition and a diet therapy during pregnancy, in the postnatal period and in the lactation period; - modern methods of clinical and laboratory diagnostics and treatment in compliance with standards and clinical protocols in obstetric practice; - principles of medication therapy and non-drug therapy, physical therapy, therapeutic physical training and medical control, the indications to surgical treatment; - principles of postoperative treatment of patients, prevention of postoperative complications, recovery treatment, physical therapy, therapeutic physical training and medical control, basis of rational diet therapy in the postoperative period; - clinical symptomatology and pathogenesis of the main processes of gynecologic pathology of women during various age periods, their prevention, diagnostics and treatment; - principles of drug and non-drug therapy, physical therapy, therapeutic physical training and medical control, the indications for surgical treatment; - modern methods of clinical and laboratory diagnostics and treatment in gynecologic practice of case-studies which do not demand surgical treatment in compliance with standards and clinical protocols;
3.2	be able to:

3.2.1	<ul style="list-style-type: none"> - estimate efficiency of medical examination; - analyze key performance indicators of medical and preventive treatment institutions; - conduct scientific research in the professional field; - keep medical documentation of various types in the medical organizations; - prescribe medicines against certain diseases and pathological processes of pregnant and gynecologic patients according to the features of their pharmacodynamics and pharmacokinetics; - interpret results of laboratory and instrumental methods of research; - establish the diagnosis according to the International classification of diseases on the basis of the main and additional methods of a research; - carry out the main and additional methods of a research in order to specify the diagnosis; - carry out episiotomy; - process and remove seams of a crotch and anterior abdominal wall, - prevent and treat complications of gynecological diseases; - identify the most frequent complications of gynecological diseases;

7. MATERIAL AND TECHNICAL SUPPORT OF DISCIPLINE (MODULE)	
7.1	The classroom for conducting lecture-type classes is equipped
7.2	Multimedia projector, screen, laptop, stationary chalk board, standard training
7.3	furniture: tables, chairs
7.4	Practical classes, group and individual consultations, ongoing monitoring are held in the educational auditorium of Khanty- Mansiysk Autonomous Okrug-Yugra "SOKTSOMiD" Address: Surgut, Proletarsky Avenue, 15.
7.5	The premises of the Khanty-Mansi Autonomous Okrug-Ugra "SOKTSMiD" are equipped with the following equipment: Portable projector; laptop; Tables; chairs; phantoms and functional interactive simulators: 7.6 Model of the female pelvis.
7.6	Childbirth model.
7.7	Dolls for teaching the birth process.
7.8	Obstetric stethoscope.
7.9	Tazomer.
7.10	Auditoriums of the simulation and training accreditation center of MI SurSU, equipped with phantom and simulation equipment, laboratory instruments and consumables in sufficient quantities.
7.11	Pregnant woman torso trainer with fetus;
7.12	Obstetric simulator with a model of the female pelvis;
7.13	Childbirth simulator with wireless monitoring module;
7.14	Simulator for clinical examination of the female pelvic organs;
7.15	Obstetric stethoscope;
7.16	Tape measure;
7.17	Vaginal specula;
7.18	Library of score sheets
7.19	Tools and consumables in quantities that allow students to master the skills required by their professional activities.
