Form of education	Full time
Compiler	Department of Morphology and Physiology
Graduate Department	Internal Diseases

Competence	Tasks	Optio	on options	Question Difficulty Index
GPC-2.2 GPC-2.3	1. Choose one correct option The main biological role of fiber is	2. activate metabo 3. Regular function 4. the menergy	tor of the motor n of the intestine ain source of for the body ain source of as and	low
GPC-2.2 GPC-2.3	2. Choose one correct option What kind of disease develops with insufficient protein nutrition:	 Beriber Rickets Rheum Kwashi Scurvy 	ri atism iorkor	low
GPC-2.2 GPC-2.3	3. Choose one correct option The main sources of water supply in large cities:	 surface artesian ground 	n wells	low
GPC-2.2 GPC-2.3	4. Choose one correct option In which months of the year does the UV intensity reach its maximum in Russia:	 March- April-M June-Ju 	lay	low
GPC-2.2 GPC-2.3	5. Choose one correct option The operating room has the following type of ventilation:	1. exhaust motivat		low

		2. Supply and exhaust with a predominance of inflow	
		3. supply and exhaust with a predominance of	
		exhaust 4. supply and exhaust	
		with equalvolumes of inflow and exhaust.	
GPC-2.2 GPC-2.3	6. Choose one correct option	1. a, b, e 2. b, c, d	mid
GFC-2.3	Foods rich in high-grade	3. c, d, e	
	protein sources are:	4. a, b, e	
	a) cereals and products of their processing	5. b, c, e	
	b) meat and meat products	3. 0, 0, 0	
	c) milk and dairy products		
	d) vegetables and fruits		
	e) fish and fish products		
	o, non and non products		
GPC-2.2	7. Choose one correct option	1. 30-45-25	mid
GPC-2.3	Optimal distribution of caloric	2. 15-50-35	
	content of food by individ ual	3. 20-60-20	
	meals with three meals a day	4. 20-35-45	
	(in	5. 10-50-40	
	%) is:		
GPC-2.2	8. Choose all correct options	1. Artesian	mid
GPC-2.3	Water from which sources must	2. meteoric water	
	be decontaminated before being	3. ground water	
	supplied to the consumer:	4. from open reservoirs.	
GPC-2.2	9. Choose one correct option	1. iron and aluminum	mid
GPC-2.3	What salts are responsible for	2. salts sodium and	iiid
G1 C 2.5	the hardness of water?	potassium	
	the nuraness of water.	3. salts calcium and	
		magnesium	
		4. salts nitrites and nitrates	
		5. iodine and fluorine	
		content.	
GPC-2.2	10. Choose all correct options	1. low atmospheric	mid
GPC-2.3	Conditions that aggravate	pressure	
	the cooling effect of	2. increased humidity air	
	atmospheric air at its low	3. low air humidity	
	temperature is:	4. time of day	
		5. presence of wind.	
GPC-2.2	11. Choose all correct options	1. vibrograph	mid
GPC-2.2	Devices for long-term registration	2. thermograph	Ш
	of meteorological factors:	3. barograph	
	of meteorological factors.	4. hygrograph	
		5. electrothermoanemome	
		ter	
GPC-2.2	12. Choose all correct options	1. mass character	mid
GPC-2.3			

	Signs characteristic of food poisoning:	 sudden onset of the disease Acute course of the diseases High body temperature The connection of the disease with food intake. 	
GPC-2.2 GPC-2.3	13. Choose all correct options Conditions that aggravate the heating effect of atmospheric air in extreme heat:	 high atmospheric pressure low atmospheric pressure Presence of wind low humidity hyperkinesia 	mid
GPC-2.2 GPC-2.3	14. Choose all correct options Advantages of fluoresce nt lamps in comparison with incandescent lamps:	 ease of operation the proximity of the spectrum to daylight The absence of sharp shadows the possibility of a variety of aesthetic shapes of lamps long service life 	mid
GPC-2.2 GPC-2.3	15. Choose all correct options Sources of hospital air pollution with gaseous substances:	 people (anthropogenic factor) polymer materials Medicines Disinfectants Dry cleaning of premises 	mid
GPC-2.2 GPC-2.3	When designing a multidisciplinary hospital, it should be provided for placement in separate build ings (blocks) of next departments: a) infectious b) surgical unit c) therapeutic d) pediatric e) physiotherapy	, ,	high
GPC-2.2 GPC-2.3	17. Choose the right combination of options How does the ozone hole affect humans? a) an increase in the flow of cosmic rays reaching the earth's surface b) an increase in the flow of bactericidal ultraviolet rays reaching the earth's surface	1. b, c, d 2. a, c, e 3. b, c, e 4. a, b, c 5. c, d, e	high

	c) an increase in the number of		1
	skin cancers		
	d) an increase in the mutagenic effect of UFL		
	e) the destruction of all life on		
	l 1 -		
GPC-2.2	earth.	1. the minimum severity	high
GPC-2.2 GPC-2.3	18. Choose one correct option	1. the minimum severity of meteorologica	high
GFC-2.5	What is a microclimate?	1 factors characteristic	
	what is a inicrochinate:	of a given area	
		2. the meteorologica 1	
		regime in a limited area	
		3. The minimum set of	
		meteorological factors	
		characterizing the	
		relationship of nature	
		to man	
		4. the intensity of	
		physical processes	
		occurring in the	
		atmosphere when	
		interacting with the	
		earth's surface	
		5. a set of natural and	
		climatic factors	
		6. that determine the	
		development of flora	
		and fauna in a given	
		area	
GPC-2.2	19. Choose one correct option	1. diagnosis and treatment	high
GPC-2.3		of diseases	
	The objective of hygiene is	2. maintaining or	
		improvement of health	
		3. Remove or repair	
		diseased tissues or	
		organs	
		4. the teaching methods of	
		examination of patients,	
		recognition of basic	
		clinical syndromes	
GPC-2.2	20. Complete the sentence	is consistently present but	high
GPC-2.3	A disease is endemic if it:	to a certain region.	
		This differs from an	
		in which there is	
		a sudden increase in the	
		number of cases of a	
		disease or a in	
		which a disease has spread	
		over several countries	
		over several countries or continents

Competence	Tasks	Option options	Question Difficulty Index
GPC-2.2 GPC-2.3	1. Choose one correct option In what units is the relative humidity measured?	 as a percentage in degrees of Reaumur in g/m3 of air in cal/cm2/min in mm of water column 	low
GPC-2.2 GPC-2.3	2. Choose one correct option Sanitary-indicative microorganisms, the determination of the number of which is used for epidemiological assessment of water are:	1. Salmonella Typhi; 2. Enterococci; 3. E. coli; 4. Shigella; 5. C1.perfringens.	low
GPC-2.2 GPC-2.3	3. Choose one correct option The most common sources of botulism are:	 mushrooms homecanned; dairy products; canned meat; cold smoked fish vegetables and fruits homecanned 	low
GPC-2.2 GPC-2.3	4. <i>Choose one correct option</i> Hospital wards can be divided into:	 General Wards; Paediatric Wards; Maternity Wards; Intensive Care Units; Isolation Wards 	low
GPC-2.2 GPC-2.3	5. Choose one correct option Essential amino acids intended only for children include the following:	 histidine. methionine. cystine. valine 	low
GPC-2.2 GPC-2.3	6. Choose one correct option What salts are responsible for the hardness of water?	iron and aluminum salts sodium and potassium	mid

GPC-2.2 F. Choose all correct options GPC-2.3		T	2 1 1 1
